Project Name: Brain Buzz

Language used: HTML,CSS,PHP

About the website:

This website is basically a learning platform for school students following the Cambridge and Edexcel examination body.

Brain Buzz is an engaging, and intelligent self learning website that fosters anytime, anywhere learning and helps K-12 students grasp complex topics easily. It also makes learning super interesting.

In this website we will be using HTML,CSS,PHP.
Here students of any age group can register themselves and get started.

Once they have signed in, they can choose the particular examination body they are following and then they will be asked to choose the class and the subject they want to

study. Then all the chapters of the selected subject will be displayed.

For each chapter, video lectures, revision notes, summary, solved past papers, Question Paper and mark scheme are available.
